### ONLINE Fieldwork: 16th-17th January 2019

Absolutes/col percents

Table 22

**Q2. This week, Members of Parliament (MPs) in the UK rejected the 'deal' the government negotiated with the European Union, resulting in a deadlock. To end this deadlock, some people have suggested a 'Citizens' Assembly'. A Citizens' Assembly would be made up of around 100 randomly-selected UK citizens. These UK citizens would hear evidence from various experts about all the options available to the UK. They would hear the argument for a 'no deal' Brexit and also the argument for a second referendum. The Citizens' Assembly would then come to a common and potentially binding 'verdict' on the next steps for Brexit, which the government and MPs could then take forward.**

**Would you support or oppose such a 'Citizens' Assembly'?**

**Base: All respondents**

**Q3. Thinking more about a Citizens' Assembly on Brexit, to what extent do you agree or disagree with each of the following statements?**

**Base: All respondents**

**Summary table**

	It would help those who voted to remain a member of the EU and those who voted to leave to find common ground	It would bring together experts and the people	MPs and the government have failed to implement the 2016 vote, so the people should decide how to deliver on the verdict without another EU referendum or early General Election	It would strengthen our negotiating position with the EU	It would betray the leave vote from 2016	I would prefer a second Brexit referendum	I would prefer a general election	I would prefer to leave the EU without a deal	It would be undemocratic, because only a few people would be in the Citizens' Assembly	It would weaken our negotiating position with the EU
