Q4. To what extent do you agree or disagree with each of the following statements?
Summary
Base: All respondents

Q4. Summary												
	I am concerned about the impacts of climate change	To date, the UK government's policies to tackle climate change have been insufficient	I am concerned about the state of the UK's natural environment (such as wildlife, landscapes, waterways, forests)	I am concerned about air pollution in my local area	An overwhelming consensus of scientists believe climate change is a problem	The risks of climate change, if it turns out to be true, are too great for us to ignore it	Stewardship of our environment is an obligation we have to future generations	Fossil fuels are running out, and we need to develop alternative sources of energy	New low-carbon industries present a major economic opportunity	Climate change policies like planting trees and reducing air pollution will also help protect local wildlife and landscapes	The UK should be proud of being the first country in the world to set legally binding emission reduction targets and having some of the most ambitious ...

Q18. To what extent would you support the following policies if they were adopted by the Government?

Summary

Base: All respondents

		Q18. Summary				
		A new government-backed loan for household energy efficiency measures, paid back through energy bills	A new rule that all homes being bought meet a minimum energy performance rating (There would be some exemptions, such as for listed buildings, fuel poor households, etc.)	Phasing out coal from electricity generation by 2025, provided enough new generating capacity can be built.	New building regulations to make sure people having large home renovations also include measures to improve a home's energy efficiency	A new national information service for the public to explain the different home energy technologies available and provide a list of local tradespeople equipped to install them
