Q6. As Britain prepares to negotiate its departure from the EU, how far do you agree or disagree with each of the following?

Summary

Base: All respondents

Q6. Summary

		Leaving the single market is a price worth paying to stop unlimited EU migration into Britain	The economic consequences of leaving the single market are so dire that I would be willing to keep the free movement of EU citizens in and out of the UK to remain inside it	Britain can thrive successfully outside the EU and the single market	Britain will become a more isolated and less powerful country on the world stage	Leaving the EU is likely to lead to the break up of the United Kingdom
