Table 23

Absolutes/col percents

Q.12 Now, I'd like you to imagine that this 'alternative vote' electoral system has been adopted, enabling people to express second, third and subsequent preferences on the ballot paper if they want to do so. If there was a general election tomorrow, using that voting system, which party would you give your first preference to?

Q.12 Now, I'd like you to imagine that this 'alternative vote' electoral system has been adopted, enabling people to express second, third and subsequent preferences on the ballot paper if they want to do so. If there was a general election tomorrow, using that voting system, which party would you give your first preference to?
