

Serial	Responses
19	Out of single market, control of immigration, reduction of foreign aid, increase in defence spending, health and education.
20	That she just hurries up and gets it done
21	Britain remaining in the single market.
22	British rules for British (English) people. Stop all free movement unless REAL/PROPER skilled workers. No more silly eu rules & costs. No more ridiculous human rights that side with minorities, we need to control what mosques etc are doing in our country and universities. Shocking there is an islamic building in our city university....
23	Full trade deal, and maintaining the good points of Europe.
24	Not happening at all
25	Now not in 10-20 years
26	Being able to act autonomously again
27	Soft Brexit
28	Cancelling brexit altogether and remaining in Europe
29	Staying in the single market
32	Morley money for disabled people
33	For the referendum to be called again!!
34	unsure
35	getting a decent deal on services and products
36	It not happening
37	More money put in nhs and all emergency services
39	With as little disruption to every day life as possible
40	No economic impact from leaving the EU
41	Swift severance of ties with Europe
42	No more information and more jobs
43	to stick to their means
44	prices don't go up
45	Still being able to be involved in the community in some ways. We must not become isolated.
46	we could stand on our own two feet
47	No idea
48	Nothing
49	No good
50	complete break from the EU
51	Maintaining good relationship with the EU, trade agreement that will benefit both sides, easy travel to the Eu
52	To be able to still trade successfully with our european neighbours and to create new exciting opportunities globally.
53	Nothing in my h life changes. I'm don't understand Brexit or why is happened etc so a good brexit for me would be that I'm not affected negatively (so keep my job etc)
54	Leaving Europe in a peaceful manner, standing on our own feet - without viciousness from any of the countries we leave in Europe. Being able to establish trade with other countries and living in peace.
55	Less money going to EU, free and fair trade agreements with any country in the world, controlled immigration, Full control over our own laws
56	Very mild terms that help us to maintain as much of what we had before as we can
57	idk
58	One that doesn't happen at all!
59	Remain allow free movement of goods and control of immigration
60	good economic deal and maintained relations with EU
61	Soft Brexit, or better still remain!
62	Not leaving the EU!!
63	Regaining control over EU immigration, agriculture, regulation and fisheries.
64	Rise of pound
65	Independence for our country and more focus on our own people rather than the rest of the world
66	Getting a good deal with the eu on imports and exports and controlling our own immigration

67 Making Britain good again, supporting our own local and homegrown businesses rather than just buying from abroad. Becoming a independent country.

68 A good Brexit would mean retaining the ability to travel and work in Europe, with no excessive crack down on immigration, plus a deal that lets us operate within the single market at least partially. But it would also mean owning our decision for independence and working to be more self sufficient, while also cooperating with the rest of Europe.

69 As little as possible changing. I voted against brexit so for me if nothing changes that would be ideal. I accept that we are leaving the European Union but in the best possible situation, I would be able to retain my European citizenship and be able to work and travel across Europe freely.
70 no price increases, ability to travel within Europe easily

71 For me it would mean not doing it.\nHowever, on the assumption we have to - maximum access to the single market and customs union.\nContinuing to protect areas where EU law has been positive - workers rights, environmental law etc.\nProtecting the rights of EU citizens living in the UK, regardless of whether equal protections are granted to UK citizens in the EU.

72 A good Brexit would mean something where we do not notice a massive change. A Brexit where households are no worse off and where our rights remain intact.

73 Maintaining free trade and good relations with the EU, whilst acquiring the ability to negotiate our own trade deals with the rest of the world and greater political sovereignty controls over immigration and no more money contributing to EU budget, introducing our own laws, maintaining trade agreements

74 It doesn't happen at all i don't see any good coming out of brixit

75 Minimal impact on the economy, house prices and mortgage interest rates to decrease to help first time buyers

76 Still connected to Europe

77 Good deals with Europe

78 No brexit

79 no longer officially a part of the union but still have access to benefits of the old union - freedom to travel etc.
82

83 Becoming an independent sovereign state, able to make our own trade deals and to make our own laws and legislation. \n\nGetting rid of the ECHR and replacing it with a British Bill of Rights which puts British people first, rather than protecting the rights of criminals who shouldn't be here in the first place. \n\nStopping all immigration unless the immigrants are skilled (a points based system or sponsored by an international company), and will be self-sufficient and without recourse to public funds. Sending back European citizens who live here on benefits back to the European country they were born in or which gave them citizenship. Productive European citizens should be able to stay in the UK. Those who have come here because our benefits are so generous, never work and have no intention of working should be made to leave. \n\nMaking all non-UK citizens pay for any NHS treatment they receive unless it is an emergency.
84 We come out of the EU as soon as possible.

85 Ensuring first that EU residents in the UK can remain there and can keep their jobs in return for a similar deal for UK citizens living elsewhere in the EU.\nThat staying in the single market is finalised to the benefit of everyone. If not, then the quick negotiation of trade agreements with as many countries as possible.\nThat restriction of EU immigrants freely coming to the UK is stopped.

86 Clearly defining what it will really mean for the country and not still constantly discussing the countries decision to leave or not

87 I good Brexit would mean that all Eastern Europeans would have to return to their own countries. It would entail leaving the single market and ending uncapped immigration from Eastern Europe in particular.

88 Getting out of Europe as fast as possible and leaving behind all the hanger on\'s
89 Apologising to the EU and begging them to take us back
Leaving the EU and ploughing the money we gave them back in to the NHS and affordable
90 homes
Maintaining access to the European Single Market, even if it means agreeing to certain EU
91 rules.
92 Access to the single market, free movement of people
no Brexit at all- cannot see a good outcome for anyone in this mess. Can we stop
93 privatising everything and selling it off abroad please?
A good exit would be under our own rules and views. We need to bein charge of our own
94 destiny now.

95 A smooth transition with continued trade and no adverse financial market reaction.
Economic uncertainty. Difficulty obtaining foreign car parts. Possible recession. Potential
96 job losses.
97 Some how leaving the EU while having the same benefits.
98 Tolerance for cultural diversity
A Credit where the UK stays in the common market and foreign workers rights are
99 protected
I would much rather it didn\'t happen. If it did happen, I\'d like to be given the choice to
100 remain an EU citizen.
101 No Brexit at all.
Get what the majority of people (wrongly) voted for but maintain good relations with
102 other nations after the split
As little disruption as possible, as good a deal for the country as possible, the best
103 compromise on all issues
104 Total independence for the UK, exit from the single market and control of immigration.

First and foremost I think it means the government having had a clear plan in the first place
of what to do and how to go about Brexit! No change to taxes. Continued (or even
increased) funding for the NHS. No massive cuts to public services. Sensible changes to
our laws. The government having worked out things like global trade deals which mean
that we as a country don\'t lose out and our economy doesn\'t shrink. The country as a
105 whole needs to be successful post-Brexit and I think this is going to be difficult to achieve.
A complete disconnect from the corrupt, unaccountable European Union - with the
106 Germans and French plunged into recession
107 not sure
108 Prices stay as they are but less control from EU over what we do here
109 No more immigration

110 As little departure as possible from European values, community & economics.
111 it was ok
112 Maintaining as close ties as possible with Europe.
113 N/a
remaining in the EEC like Norway so we pay no import duty on items bought from with the
114 EU/EEC
115 No leaving the EU!
Gaining back our sovereignty so that we can make our own laws and we can choose who
we allow to settle in this country both for our sake and theirs. People don\'t seem to
understand the UK is not a magical place where lives are transformed for the good
116 overnight.
117 none

Maintaining a good relationship and trade with the EU, remaining in the single market even
119 if it means allowing freedom of movement of EU citizens
120 Retaining access to the single market
121 That we can take charge of immigration and get our country back

Scotland and Northern Ireland should be able to have separate deals or agreements, and the Westminster government need to ensure that the deals they make are best for the majority of the population, and not just satisfying the loud minority.
122 Fast and a good deal
123 Stop so much immigration, and make our own laws.
124 closed borders. exit from the single market
125

That the EU stays out of our decisions in the UK and in turn this strengthens our economy by starting to look after our own people instead of everyone else's.
126 Leaving all of the EU
127 Honestly I wouldn't want to exit the EU fully as I'm concerned about some of the things people are planning to do when we're out like changing human rights, so I'd like to still be protected by the EU.
128

I want to remain, so a good Brexit would mean no Brexit. However if Theresa May was more open ... about everything ... then this would help. We need to be able to trade easily with the EU and we need to have free movement, we also should be working with the EU to agree new rules for the movement of people. \n\nOur economy is already showing signs of the problems we could be seeing in the future, the government refuses to talk about anything at all, a large number of people think there isn't a plan and that those in government can't agree!
129 As an advocate of Remain, I just hope Brevity does not negatively impact the UK. A smooth transition is necessary.
130 No it's. Not
131 more jobs
132

Britain can be more powerful coz we can give more chances for our people to grow finally making the country to grow financially n also individually that we don't actually leave
133
134
135 Maintaining strong links, including trading, social & economic, with Europe
137 I have no idea - the entire Brexit debate has become an absolute debacle!
140 Free movement, access to single market

To have a country that doesn't lose out financially and can be able to trade with the rest of the world. Also for a country to be free to be able to govern themselves without other countries being able to influence the country.
141 A good Brexit would be where the country is less involved with the EU but not cut off. A compromise.
143 crisis means crisis
144 No drastic changes in a negative way
145 A quick exit and for us to start and get our house in order
146 full control of borders while maintaining a trade deal with the EU
147

That after the Brexit we would have an immigration scheme to avoid every migrant coming in to the country and a price fair scheme to help prices stay at reasonable prices to avoid high bills and groceries. It would mean saving money and it means for a better future.
148 unsure
150

negotiations to enable us to trade worldwide including Europe but I believe Brexit means we will no longer be able to access the single market. I hope for a fair system of immigration enabling those who have something to offer can continue to come.
151 There is no good Brexit, only a least worst. So retaining membership of single market and much of the social and environmental legislation. A solution that meets the needs of Scotland and Northern Ireland. A result that leaves Nigel Farage and UKIP on the margins would be nice.
153

Leaving the EU with no reduction in my household's finances or ability to travel.
154 i don't think it exists
155

156 Nothing is a "good \brenxit" (sounds like a breakfast!), I'll be opting in to the EU & I'll probably move there eventually.

159 A good brexit to me would be No rises in tax or high interest rates . And little to no changes in the cost of living due to higher costs of importing goods and raw materials.

160 Complete break from Europe

161 Higher food prices and fuel prices.

162 It means England not being part of europe

163 Leaving the EU

164 Proper controls and a reduction on, immigration.

165 Being able to travel in Europe without restrictions

166 Regain our sovereignty. Make our own laws, not be told what to do from unelected officials in Brussels. Protect our borders.

167 Where we retain full unrestricted access to the single market and farmers have access to the labour they require from wherever

168 A good Brexit would mean to be able to support ourselves financially for the foreseeable future.

169 No longer being part of the European Union.

170 We are going to leave whether we like it or not

171 a turmoil and era of uncertainty

172 not leaving

173 Great Britain being independent again.

174 Leaving the eu and getting the border controlled again

175 We would leave full membership of the EU

176 Free movement of people and access to the single market

177 Staying in the single market and continuing free movement of labour. Treating the EU as a proper partner and not as the enemy.

178 Better for all

179 Not doing one

181 Being in control of our borders. Not be governed by Brussels.

182 Brexit!

183 Good student links with EU countries

185 Access to free trade and movement across europe

186 Nothing

187 More control of our borders, immigrants already here can stay as expats can stay in the appropriate countries and free trade

188 Essentially what we already have. Good trade agreements and free movement of people. Block on immigration, maintenance of existing trading arrangements, return of control of laws to our parliament not the socialist Euro agenda. Enforced use of English for all

189 immigrants

190 Not leaving Europe at all!

191 prosperity for the uk. europe can burn

192 stay as we are

193 As little change as possible as benefits of EU membership far outweigh negatives

194 Exactly what they promised. "If you vote brexit, that is what you will get". Fully out and negotiate access.

196 Being out of the EU and making all our own rules

197 No brexit at all

198 Keeping euro trade deal

199 A good deal with the other countries.

200 The best economic result for Britain, where we are no worse off than currently, and manage to negotiate good trade deals with the rest of the world.

201 Not happening at all.

202 To get it done quickly, stop dragging it out

203 dk

204 not sure

I don't believe in such a thing- I'd rather remain. but if it has to happen, it would be "soft", with free movement, opportunities to travel for work & education protected, EU citizenship protection (i.e. for my EU citizenship to be retained), and protection for EU citizens who are already living, working and studying here, with reciprocal arrangements for BG citizens in the EU.

205
206 No more immigration in the UK

207 Hard brexit. Leaving the single market to completely unshackle from EU rules

208 In the long term being a member of a massively restructured eu. In the short term minimal negative impact on the UK and its relationship with Europe.
209 No Brexit at all would be good, otherwise continued membership of the single market and customs union
210 still able to trade freely with the rest of europe

211 Preferably no Brexit, but if it does happen, continued trading links with the EU by remaining in the single market and customs union, allowing EU citizens living and working in the UK to remain here, maintaining the current cheaper university fees for EU students wanting to study here, staying within the European Convention on Human Rights, keeping membership of the European arrest warrant system, encouraging Nigel Farage to go and live permanently on the USA.
212 No customs union , no ECJ
213 Take back control but positive actions alongside EU

214 Maintaining open trading relations with the EU, continued free movement of people and capital. Constructive, friendly continued diplomatic relations with EU and co-operation on world affairs. Open and constructive relationships being built it's the rest of the world. That the population of the UK maintains an outward looking, welcoming attitude and does not retreat into insularity and little englander attitudes.
215 Scotland and N. Ireland not being taken out of the EU due to the will of people in other countries.

216 Trade deal with Europe without open borders and unnecessary bureaucracy.
217 bring back control of our country
218 Leaving the Eu!

219 It would mean that continued to allow free movement of people & that would allow to remain involved with Europe even though we have to leave the EU.
220 less EU Bureacracy, but close trading prospects
221 No more immigrants allowed into the country and a safer border
222 The pound being at a good exchange rate, and still having good trading links with Europe as well as the rest of the world.
223 No Brexit is good in my view, but it is essential to retain membership of the single market and the customs union.
224 No ones knows
225 Having OUR say on laws and immigration. Not being instructed by Europe on what we can do and cannot do!
226 Remain part of the single market and free movement of people
227 No brexit
228 done smoothly with minimal fuss even if that takes longer.
229 for it to happen, sooner rather than later
230 Leaving the European Union but keeping within the European common market. There are around the same number of countries within European which export to the UK as there are importers.

231 A good Brexit for me would be for T May to go to Brussels tomorrow and cut ALL ties with EU. Then come home and close our borders to ALL immigration. stop sending any money to EU and see how it goes from there.
Set up an immigration unit and allow in some migrants from troubled countries and workers that we need.
When that is done negotiations can start on any other issues but we must be outside EU before this can happen

232 No Brexit at all. Seriously how stupid does a country need to be to shoot itself in the foot like this.

233 Breaking away fro the waste and corruption in Brussels would be liberating. The EU is a failing institution and the Euro itself will fail. States such as Greece, Portugal and Italy cannot live in economic partnership with thw advanced northern economies. Good trade deals with the world outside the EU will see UK prosper.

234 Single market access
A Brexit in which we didn\'t leave the Trade Market, a Brexit in which the pound stayed and a Brexit in which we were not racist toward immigrants. A Brexit where the pound strengthened.

235 there cannot be a good brexit

237 Knowing that we\'re taking care of ourselves. Making our own trade agreements...
238 Withdrawing from the EU, taking control of who is allowed in to the UK, try to negotiate favorable terms of trade.

239 Get the best deal we can from the EU ,if they do not,get out as fast as we can and trade with the rest of the world.After all the EU needs us more than we need them.

240 Maintain access to the common market and complete Brexit with minimum disruption.
241 leaving europe should be easy for all
242 dont know

243 Giving up the whole idea, and committing ourselves to a full participation in the EU.
244 it not happening
245 Removing social, educational and economic divisions.
246 MAKING SURE EVERYONE GETS A GOOD DEAL
247 cut immigration take control of our laws
248 out of the European union fully
249 it doesn\'t happen
250 dont no
251 Getting out of Eu for good
252 not paying for europe\'s cock-ups, having border control and starting to create our own laws for once again

253 well I do agree coming out of eu is a good thing maybe because we are no longer under the rule of eu rules that are rules set for all but we are all different country\'s and have different problems speak different ive never understood why we have the same rules and yes we are also far to full our services cannot go any further to provide services for people that haven\'t put anything in the pot to start with!

254 No arguments or Troubles when leaving

255 Keep British companies running strong and employment for British people.
256 Out of EU and be independent as we werebefore
I cannot imagine a good brexit. I think the whole idea is disastrous. We are stronger together.

257 Not happening at all

259 To put a halt to immigration all together and then only issue a visa to anyone that we might need . Send back all illegal immigriants Leave the single market
260 we still maintain good relations but control our own country
261 Not sure.

262 Minimal disruption of existing trade deals, and continuing links with our European allies.
TO BE ABLE TO CARRY ON HAVING THE OPPORTUNITY TO WORK ANYWHERE IN TH EU
263 AND LIVE THERE
267 Out fast
269 No idea
Maintaining access or equivalence to the single market but greater controls on
270 immigration.
271 More job opportunities

272 Get away from the interfering non elected politicians who keep messing with our country
asap

274 Scotland still has access to the single market and free movement of people

275 Staying in the single market with full freedom of movement and protection for the NHS

276 Stop all immigrants unless they already have an employment offer and to cancel their
status if they cease to work for that company. Ending the bureaucratic gravy train. Ending
the court of human rights and introducing a constitution for British Citizens allowing the
deportation of any immigrants who commits an offence leading to a custodial sentence.
277 Maintaining free movement of workers without eu red tape and costs
278 We stay \'friends\' with Europe, no political fights

279 Completely leaving the EU for good - no more payments to the EU and no more say in our
rules and laws. A trade deal is a separate issue but there should be no compromise on free
movement of labour as that is what many of us voted for when we voted leave. Access to
the single market would be ideal but is not essential - we buy more from Europe than they
do from us and it is not in their interests to make trade between us difficult. A deal should
be done to allow British citizens in Europe and EU citizens in the UK who are already here
to be able to stay, again it is in both our interests to do this.

280 I would like it to be cancelled altogether

281 unsure

282 It would mean us taking control of immigration, lifting red tape and being able to flourish
like the history we were built on.

283 Maintaining trade deals

284 Everything promised coming true, lower immigration, free trade

285 Remaining a member of the single market and not totally closing borders

286 that we still get what we do now from europe

287 Strong pound \nFree world trade, no punitive barriers in EU\nNo barriers to travel

288 I couldnt comment as to a good brexit as i voted remain and still think it\'s a bad idea
One that avoids damaging EU and British relations that may have a detrimental impact on
289 the country beyond market access.

292 Leaving the EU but with good relationships with the other countries

293 Ok Adopts as much of the same eu policies to reduce costs in rewriting everything and
making drastic changes to agriculture/pharmaceutical and travel industry. Same level of
Funding will still be given to departments as was allocated by the eu
Stability of economy\nCountry (in general) uniting behind the deals that we are signed up
294 to

295 Getting totally out of EU and no more freedom of movement

296 keeping as much of the European safeguards as possible

297 The UK economy not crashing and the pound going below 1 to 1.20 to both US dollars and
Euros.\nControl of immigration but ensure the economy does not suffer from it. More
control of the laws without losing the good ones that have been put in place by the EU.

298 Anything as long as we leave europe as quick as possible.

299 Leaving the EU completely.

300 Good, for me, would be what is often referred to as soft Brexit. I am very fearful of what is
described as hard Brexit.\nAs a past winner of Queen\'s award for exports, I know how
valuable the open access market is, free of control. Our European trading partners cannot
be relied upon to provide us with such free and easy access after Brexit, hard or soft.\nA
good Brexit can only follow some honest acknowledgement by its proponents of the
practical difficulties that will be presented by any level of withdrawal.

301 Get out of europe and away from the single market

302 Control of borders and more money to be spent on UK services rather than Brussels
303 A good Brexit would mean still having access to the EU trade market.

That the UK negotiates fair terms for the things it needs from its European neighbours. I
304 also think that having voted Brexit the country can't expect any favours.
305 staying in the eu

306 Keeping the social part of the Euro but not necessarily the restrictions on trade

JUST WALKING AWAY, NOW! THOSE E.U. MEMBERS THAT WANT TO TRADE WITH US
CAN, BUT ON OUR TERMS.. GERMANY, FRANCE, AND A LOT OF OTHER E.U. COUNTRIES,
HAVE A FAR, FAR LOT MORE TO LOSE THAN WE DO. GERMANY ALONE, COULDN'T STAND
307 A LOSS OF TRADE TO US, THAT WOULD RESULT IN 1-2 MILLION PLUS JOB LOSSES
308 Maintaining open borders, free trade and not making very many changes.
309 blocking of our borders for all still get good trade deals

310 Actually leaving the European Union. Including the single market and customs union
MAINTAIN GOOD RELATIONSHIP WITH EUROPEAN PARTNERS AND THE EU. ACCESS TO
311 THE SINGLE MARKET.
312 The country and the people do not suffer with increased costs and taxes

None at all. But at least one with strong ties to Europe remaining. Options to easily allow
movement of people if not quite free movement and a strong trade deals that encourages
trading with european countries.\nA commitment to projects like single skies.
313
314 No brexit
315 speedy without inteference

Paying as little as possible for the administration of the brexit. And policy and workings of
our relationship with the EU carrying on almost exactly as it currently is
316
Good Brexit means that we can peacefully and amicably negotiate our departure from EU
and still behave like good neighbors.
318
honestly dont have a clue
319
cannot wait for britain to leave the E U
320
What we voted for, repeal the 1972 act and fully leave membership of the eu. No fees, no
movement of people and NO single market
321

Maintaining good trade deals, ensuring we continue to follow environmental regulations,
ensuring costs of goods don't increase, improving the strength of the pound,
322

the economy and the pound not crashing, retaining close links with europe
323
Keeping the trade, science, education, freedom of movement, payments to farmers and
controls on fishing that existed before.
324
better pay
325
SECURITY
326
Not sure.
327
We completely leave the EU and the single market
328
a good brexit would mean not leaving the EU
329

A good, uninterrupted, trade deal between the UK and EU. Also trade deals set up with
other countries so when the "exit" button is pressed (or the process Article 50 initiates
concludes), we are not stuck on IMF deals with everyone else.
330
No Brexit at all! I wanted to remain in the European Union.
331
Living by our laws
332
It not happening
333
Hard Brexit, full control of borders and out of the single market
334
not leaving the Euro would be the best thing for me!
335
A good Brexit would be no Brexit at all. The disadvantages of leaving the EU are going to
far outweigh any advantages.
336
Staying in!
337
Free movement within the EU for goods and people but no payments made to foreign
nationals or dependents abroad
339

340 Free trade and movement of people. Minimal disruption to business and people.
342 Stay in the single market, no tariffs. Alternatively scrap the brexit idea totally as it is poorly
thought out and frankly idiotic!

343 The ability to take back control of our borders (ie. immigration) and our laws (especially
human rights law) without seriously compromising our trading relationships with Europe

344 I AM SO CONFUSED THAT I AM UNSURE. WE NEED TO STAY IN THE SINGLE MARKET AND
345 ALTHOUGH I THINK THAT IMMAGRATION IS A GOOD THING WE ARE ONLY A SMALL
346 ISLAND AND ONLY THOSE WHO HAVE SOMETHING TO OFFER SHOULD BE ALLOWED IN
347 Free movement intact, remain in free market
348 removal from the EU
349 nothing would be good
350 The end result being Scottish independence
351 Quick.
a clean break with no hidden agenda by the government
dk

352 Control unrestricted immigration.\nTake back law making.\nIdentify and deport illegal
353 immigrants.\nBuild strong trading links outside the EU.\nLook after British people first by
reducing overseas aid to the countries that don\'t need it i.e. India.\nSupport British
companies rather than foreign ones.\nStand up for the British way of life and culture.
More control on immigration.
Continued access to the single market, retaining at least some elements of the customs
354 union, some free movement
355 No brexit
356 STILL ABLE TO MOVE FREELY IN EU WITHOUT THE NEED FOR VISAS
357 don\'t know
360 Small or no increases in my cost of living.
361 Not leaving the EU
362 no brexit at all
363 I have no good things to say about brexit.
364 cost of food not rising nor the cost of other good we all use and take for granted like online
shopping from other countries petrol etc.holidays.
365 out soon

366 maintaining trade links with europe and adding new deals with the rest of the world

368 Briten\'s exit but that is not beneficial for country\'s economy in long run.
369 not sure
370 phased leave

371 Control of our finances and borders Doing away bureaucracy and silly laws.
372 Keeping EU citizenship.
373 Maintaining trade with Europe and the world, taking back control of out own borders and
laws.

374 Completely revoking our membership from the EU including the single market. Then we
can make our own trade deals with the world on our terms, control our borders and make
decisions for ourselves without interference from un-elected bureaucrats in Brussels.
Brexit will allow the UK to decide it\'s own destiny and become a key player on the world
stage again.
375 Remains in the single market

376 No freedom of movement- a consistent visa/green card system for ALL nationalities.
Access to free trade, maybe paying a small fee but not sacrificing any other principles and if
it can\'t be obtained that way then leave entirely, operate on WTO rules. Sovereignty of
377 our courts/parliament and no influence at all from EU.
378 no such thing
keep inflation down

that financially we are better off, we have access to the trade agreements with the rest of
379 Europe
380 Retaining our travel and trade rights with the EU in the main
HAVING A CLEARLY DEFINED POLICY ENCOMPASSING ALL ASPECTS OF THE BREXIT
381 PROCESS AND ANSWERING ALL QUESTIONS RELATED TO IT
382 One where the country prospers after it leaves the EU
383 Good economy
384 a disaster
385 good relationship with all countries EU amongst them
387 DONT KNOW
389 Something that works for everyone

No free movement of EU citizens, being able to choose who we deal with, when we deal
with them and for our benefit and not for the whole of the EU. Immigration to be cut. We
should be able to kick anyone convicted of a crime out of our country and bar them from
returning. Return all illegal immigrants to the country they came through before they
reached us. Ability to make trade agreements for ourselves and in our favour. Ability to
control our own borders, our own laws, employment rights. To not have another
390 country(s) telling us what we have to do.

391 Independence from Europe and freedom to trade as we wish
392 The economy gets better
393 More jobs
394 Absolute hard Brexit, exit the market & end free movement of people.
395 Britain exit from Europe on its own terms
396 Staying in Europe and forgetting it happened
397 not leaving

398 stop all the scroungers coming over here and get rid of the ones that are here
399 No idea I find it a bit confusing
Leaving the EU without the economy and jobs nosediving. No effect to my finances or my
400 family.

401 I don't think there is the possibility of a good Brexit if I am being perfectly honest
402 So we don't get left high and dry
403 MUCH LESS IMMIGRATION BETTER ECONOMY
404 Completely free from Europe
405 Staying in the single market and keeping free movement
406 No Brexit. End this silly idea and start making a success of the EU.
407 less unemployment - British jobs for British people
408 quick and decisive so everyone knows where they stand
A good Brexit would mean the UK not depending on the EU for everything, and getting our
409 justice system back
410 A good deal on trade agreements.
411 As little Brexit as possible
412 I don't want to leave BREXIT, so it's not good

The Remoaners accepting that we ARE going to leave the EU and that Britain is looking
outwards to a bright new future. Oh, and that the bureaucrats in Brussels wake up to the
fact that trade and self interests will prevail and that Britain has sufficient clout to get
413 appropriate trade and migration deals.

414 No Brexit
415 good economy for the country
416 To keep free trade with the EU
that Britain has a fair place in the world and our quality of life stays the same with the
417 chance to improve
418 No change to the status quo
419 NOT SURE

We would become a country led/ruled by ourselves without any interference from the
Euro block. We have never been classed a full European member, firstly because we are
420 an island and secondly because we would never accept the Euro.
421 no Brexit or access to the single market

UK can trade with any other country without being penalised unfairly. People can still
422 come here to work and UK citizens can work in any country they want.
423 People stopping talking about bloody Brexit.
To have good trading while no longer being part of the EU, and to have fair regulation
424 when it comes to immigration
425 out of the single market and the customs unit

426 Leaving the EU completely, leaving the single market, having control over our own borders
427 not sure

428 To leave the EU and secure/control borders with freedom to make our own laws
430 Stability and good business deals with other countries
431 If it didn't happen...
432 Leaving as quickly as possible
433 Lower prices on food holiday and taxes

434 Out of Europe but access to the single market. We will need control over immigration and
a points based system for workers for key industries and services.

435 cut down significantly on immigration and control our own laws and borders
436 Quickly with a secure economic future still in place

438 People in the country coming together to put up a united front and, if necessary, cutting
back on their spending until the country finds its equilibrium. We have become too used to
439 a throw-away society, easy come, easy go.
440 good economy, safe nhs, free movement
441 Complete break from E.U.
Staying in the EU or negotiating a good departure -one where we can still travel freely into
442 Europe without visas or extra costs.
443 A good brexit would mean that things would be as much like before brexit as they possible
could be
444 Staying in the single market
A good Brexit would mean not making the economy worse, not losing human and civil
445 rights, not making it harder to travel and work in the EU, not endangering our public
services further, not increasing xenophobia.
446 A complete u-turn so we can stay in the EU!
447 leave EU single market. manage own rules and laws
getting things right don't let theresa may get involved

448 keeping some relations open with europe so we can trade and travel freely

449 Access to the EU single market in return for a sensibly negotiated annual fee, plus an
insistence from the EU on current fundamental rules on employment rights etc as part of
the deal. Unfettered immigration into the UK however is not negotiable. We need to be
450 able to ensure that our internal social services infrastructure can cope.
A clear HARD break

451 That we can still trade as easily with the countries we do at the moment.
That they sort out the immigration problems.
That they take care of the people who live in this country.

452 Interest rates rising, house prices falling, access to the single market, lower net migration
453 Stronger economy

454 Doing in properly and leaving the single market. Taking time to do the job properly
455 Better employment prospects for the country
It would mean having a good control of our country and laws with sufficient access to
456 trade within Europe
458 you cannot have a good Brexit - Brexit is nonsense
A hard Brexit if necessary - one that enables us to control immigration, even if it means
459 losing access to the single market.
460 A second referendum on the final offer

461 to cut legislative powers with brussels but to maintain trading links with the EU
462 No Brexit and the continuation of freedom of movement
463 better income

one that would mean, that Brexit does not happen. That the UK stays part in the EU and
464 that we get on to more serious issues like the war in Syria

465 Neutral

466 Good trade deal with Europe

467 Ability to control own financial and economic status

468 Not being ruled by Germany and having control of our borders

469 not doing it

470 Not Brexitting

Completely out of the EU. As quickly as possible and then let industry decide for itself
471 what steps it wants to take to trade. The government should stop being a nanny state.

472 Not being bound by EU law, but still maintaining close ties with Europe

473 There is no good Brexit

474 Benefits for people of our country

Trade deals with new trade partners outside of the EU. \nShared intelligence & security
475 information with the EU.

476 NOT LEAVING THE EU

477 out of the single market and an end to uncontrolled immigration

If the whole process was completed without politicians spending more time arguing and
478 complaining about each other than actually working together to ensure a good deal/result.

479 Remaining in Europe!!

480 Controls on Immigration

481 Less immigration, more jobs for us, no more bullying from Brussels

Achieving sensible deals and exit strategies. Without being punished by other insecure
482 members of the EU

483 Better reforms, better quality of life and also travel within Europe

484 Remaining or as near to that as possible

485 getting a good deal

486 we control our own parliament

487 control of immigration and access to the market

488 LEAVE NOW

489 A good Brexit would mean it wasn't happening.

490 limit the bad impact to the economy as much as possible

491 for me there is no good Brexit

Being able to have control on immigration but also have free flow to European country to
492 visit, work and study

Getting it sorted in as shorter time as possible. Actually I did not vote to leave the EU, but
since it is going to happen, a quick exit would be better. Theresa May is not going to get
everything she asks for as far as Trade deals and that go, but she will fight for the best deal
494 possible.

Very little change with visa free travel throughout Europe, no EU laws applying to UK, no
495 payment to EU, free trade with Europe maintained, no change in security arrangements.

A good Brexit would mean no Brexit at all! \nI would prefer a "soft" Brexit, with access to
496 the single market and still keeping good relationships with other EU countries.

Complete withdrawal from the European Union and from the single market. We would be
497 free to set all of our own laws and make our own trade deals without restrictions

499 No more punishment in cutting a person's money

502 Leave Europe completely

503 I never wanted Brexit

504 still maintaining strong cultural and financial links with Europe

A deal where people won't lose their jobs because the products or services they provide can't be sold without tariffs increasing the costs. People already living here not being told to leave the country because they don't fit certain criteria. Our existing legal entitlements not being taken away when the break finally occurs.

505 Stability for uk economy, the £ to increase in value again, basically to get the best deal possible

506 Reducing the number of immigrants, freedom to make trade deals with individual countries

507 Completely get out of Europe, no ties.

508 to go through smooth as possible

509 Easy, complete, agreeable, laws made by Britain for the British

510 THAT WE CAN MAKE OUR OWN RULES ON EVERYTHING, IMMIGRATION OR TRADE WISE ETC.

511 FAIR EXCHANGE OF TRADE AND FOREIGNERS ALLOWED IN

512 Negotiating the best deal for Britain in respect of trade and immigration.

513 Independent and free from EU clutches

514 Best trade deals possible and control of borders

515 Leaving the EU, but remaining as part of the single market.

516 Being able to succeed on our own with our own rules. Controlling our borders, being tougher on migrants to learn english as and integrate

to stop the influx of immigrants so that there is less of a financial burden on the u.k. especially when it comes to the NHS and benefits and to be able to trade with whoever we want without restriction so that we are not bound by any laws from the EU

518 more jobs for English people and better nhs

519 That we still be part of euro

520 worries

521 That we cut all ties with the EU and and we start again with trade treaties.

522 MAKING OUR OWN RULES

A quick withdrawal from the EU without any penalties and taking back control of our borders and stopping immigration and benefits to immigrants

524 No change to the way things are now remain in EU

525 To get the bloody thing sorted out. No more petty bickering.

Control of borders, immigration, courts, and law making. Ongoing commercial relationships with companies in Europe and worldwide including commonwealth countries. Suitable arrangements with Europe to enable the City of London to continue as leading world financial centre. Continued cooperation with Europe on defence, security including cooperation in identifying terrorist threats. No obligation to provide funds to Europe. A continuing warm relationship with EU member countries.

527

There can be no good Brexit - I'm a Remainer - but if it is to happen, it must be by open, honest and mature negotiation - with any decisions taken to Parliament for debate.

528 Brexit means Brexit and all illegal people here should be sent back

529 Being able to leave the EU with low immigration to the UK and sensible tariffs

No Brexit at all. By any means possible up to and including a coup d'état. Any change in our relationship with the EU will be a complete disaster and a tragedy.

531 That Scotland would be able to afford to improve social services, health care, education public transport, etc

532 Clean break from the EU and ability to set up our trade deals with individual countries.

533 Quick hard Brexit would mean the country can get on & develop business throughout the world.

534 Keeping as close to the EU as possible, including keeping access to the single market & free movement of people

535

A GOOD BREXIT FOR ME WOULD BE STILL BEING ABLE TO TRADE WITH EUROPE WHILST
 BEING ABLE TO SET OUR OWN BORDER CONTROLS AND NOT LETTING EUROPE HAVE ANY
 CONSOLE OVER OUR LAWS OR BUSINESS PRACTICES. IDEALLY IT WOULD ALSO MEAN
 536 PAYING NO MONEY INTO EUROPEAN COFFERS
 537 control over borders and laws, be part of global economy and not just EU
 538 Fairness and good economy
 No Brexit at all. I would like the whole idea of Brexit scrapped and we go back to the way
 539 we were in 2015 which was much better.
 540 Leave the EU completely as soon as is possible
 A good Brexit would mean able to maintain the services of the high profile jobs and
 immigrants from the financial sector in the country and also provide support for those who
 541 are struggling to make ends meet.
 542 Economic stability

543 It would have to be a complete reversal of the vote and a decision taken to stay in the EU!
 544 Being a member of the EEA.
 546 Not sure
 547 Making Parliament supreme in all areas
 548 no interference from brussels
 retains access to the single market, protecting all existing rights in employment and other
 549 social protections

551 Exiting the EU without ANY further payments & Full Control over Immigration

becoming an independent Nation again - not being controlled by European dictators who
 have not been elected as our MPs have. Being able to purchase our goods from whatever
 country we wish to do so and able to import from the Commonwealth again. Our Laws not
 being over-ruled by non elected anonymous figures hiding away under the auspices of the
 EU. Not having to pay MEPs extortionate salaries and expenses for being in Europe.
 Having control over how OUR finances are spent. Perhaps being able to stem the tide of
 immigrants trying to come into Britain expecting to be looked after and taking our money
 that we have paid during our work period of some 55 years plus and now receiving
 reduced benefits. \n\nOur Health facilities being used and abused and leaving more time
 552 for the contributing community to receive the benefits to which they are entitled.
 553 quick and decent returns
 554 Ensuring that we get the best deal possible to be in a strong position.
 555 I believe a good Brexit is an oxymoron
 556 Keep trade
 557 No changes at all. Not likely but hardly any changes would be best.
 558 NO MORE FREE BORDERS AND IMMIGRANTS FLOODING THE COUNTRY
 Getting out of the EU as soon as possible, cutting immigration and getting back control of
 559 our country.
 Protecting trade between the UK and the EU. I don't see how any benefits can be
 achieved. It's a bit like joining a club that aims to save you money and give you exclusive
 access to products only to demand that you still have access to them when you cancel your
 560 membership!
 To leave European Union for good and make our own way in the world as we used to.\n\nTo
 then manage our own borders, and get rid of any foreign criminals without worrying
 561 whether the ECJ says we can or not
 562 Brittan will leave the EU completely
 563 Nothing

A clear exit, leave the single market and to not be part of the customs union. I just want us
 564 to be an independent sovereign trading nation, free of ALL eu ties.

565 Good relationship whit other EU countries, good deals for trade, tourism,etc

the collapse of this government, a concerted attempt to explain the benefits of EU
 566 membership and stop the lies of the papers, particularly the tabloids
 567 Leaving as quickly as possible with the best deal for the UK.

568 nothing not interested

569 Staying within the customs union, allowing free flow of current EC citizens seeking work

570 Regaining control of immigration while trading with the world, somewhat like Switzerland.
571 remaining!

572 No such thing as a good Brexit. I don't think we should be leaving the EU
Regaining FULL control of own borders and removal of EU influence over our judicial
systems. If we could maintain membership of the Single Market it would be nice but by no
means imperative. I am prepared to pay a considerable economic penalty to 'get my
573 country back'.

574 A good Brexit would be one that doesn't have a negative impact on the economy.
575 freedom of trade
576 Cut all political ties with Europe
577 A good Brexit means we can still trade with Europe
578 Control immigration, make own laws,
Our removal from the EU as quickly and as painlessly as possible. The trading issues can be
579 dealt with at a later stage if necessary.

580 a hard break if the EU don't give us free market without control of borders
A quick transition from the EU, sensible decisions from all parties, with minimal impact on
581 the UK financial position etc.
582 hardest Brexit possible.
583 freedom from European red tape and control
A good Brexit would mean that we would get out of the EU quickly, not letting it drag on
for years, not letting the "Brexiters" keep delaying our exit.
584 The longer it drags on the
585 worse it will become.
586 migration reduced and controlled
587 completely out of European unity

A good Brexit would mean other countries seeing we have left, and be brave enough to
588 follow, then a much fairer and cheaper system put in place.

I can't imagine there is such a thing as a good Brexit - it was a mistake to vote this way and
prices are already rising and there is already unrest against EU nationals. It is shameful that
589 the UK thinks it can go it alone when together is stronger
There's no such thing as a "good" Brexit. It'll be a disaster, especially since May is an
590 incredibly weak PM.
591 It happens quickly
592 Not to impact my finances at all
For it not to happen at all. I think we need to stay in the union and make reforms from
593 within.
594 A full break from the EU

Good Brexit would mean that the process is put in place asap and we remain strong and
true to what the people who voted 'no' wanted. It means not dithering about and
causing more uncertainty. Large businesses must also stop blaming Brexit on their lack of
sales or bad management.
595 Good Brexit would mean being fair to those people from
Europe who are here already earning money and paying taxes but it also means that any
others need to have the relevant paperwork to get in.
I don't think there can be "a good Brexit" But it would boil down to Scotland getting a good
596 trade deal & accepting freedom of movement
597 Soft
598 More money and opportunity for me and my family, job security.
To leave the European Union without it costing too much in exit fees and still be able to
599 trade with everyone without penalties
600 stay in the single market
No price rises, the freedom from laws decided by Brussels and not paying the EU vast sums
601 of money
602 don't know

603 Britain staying in the single market including free movement of people would be ideal.
604 Getting out of Europe's control to manage our own laws etc

605 no Brexit at all. Retaining as much of the EU related stuff like the single market as possible.
We stop paying anything to the EU. We get to control our borders to stop unwanted
607 immigration. We can set up deals with any country we choose without the EU putting on
tariffs.

608 Complete control over our laws and borders, and ability to do business with the world
609 no higher unemployment or costs to the general public

Full control of our borders. That doesn't mean no immigration but means we choose who
we let in to live and work here based on those people who are willing to work and have the
skills that are a benefit to our economy and which are currently in short supply. It also
means that our parliament and justice system regain their status of the final authority in
decision making. Any of the laws that we have that are EU laws can be made British laws if
610 they are a good thing and we can ditch the ones that aren't.
611 No change to what we have now
612 Means leaving the European Union and the single market.
613 Access to the single market and customs union
614 Everything stays the same

615 There is no such thing as a "good" Brexit we need a second vote and remain in the EU

Total separation from the EU and particularly from the European Court of Justice, with the
616 power to control our own borders and the ability to do it.
617 That I didn't end up paying extra for food or car fuel.
618 Dk
619 not in favour of Brexit the UK should stay in the EU
620 no changes as retired but dearer holidays
622 no idea
623 Retaining trade and free movement arrangements
624 It should mean Brexit as the majority of this country wants

625 a Brexit that worked for ordinary people rather than big business and bankers.
626 A soft Brexit where we aren't totally cut off from the EU.
627 Staying in Europe

It would mean our government having a look at the sort of deals other non EU countries
have that are in the single market and putting together something very similar. It would
also entail the government finally admitting that immigration from the EU is not the issue,
it is the thousands coming in from non EU countries that are causing mayhem. Immigrants
they could actually control if they bothered to. We agreed to a Common Market and the
government, without our consent, put us in the EU. We need to go back to the Common
628 Market and do as Iceland, Liechtenstein and Norway have done or even Switzerland.

630 Very quick but with trade relations with Europe intact. Less immigration from Europe.
631 Not leaving!
632 leaving the EEC as soon as possible
To still have really good business links with European countries and ease of movement
633 when holidaying

To be rid of the corrupt practices and interference from the EU. The money pit that sucked
huge amounts from the UK, and turned the NHS into an International Health Service, and
which run roughshod over UK citizens' human rights will be behind us, and we will be free,
634 repeat, free to rejoin the Commonwealth and be masters of our own destiny.
635 Right out of the EU

retaining access to the single market, whilst seeking out the best possible trade deals for the UK amongst nations external to the EU. Maintaining the protection of workers and environmental rights. Continuing to allow freedom of movement for skilled labour to and from the UK, whilst introducing a points system for migrants similar to that of Australia, to ensure the UK accepts quality immigrants (excluding refugees) that are not detrimental to

636 UK society

637 There is no good brexit, only bad brexit and/or worse brexit

Too be completely out of Europe. To have proper boarder control, stop immigration and get our country back.

638

639 Immigration completely stopped

640 still freedom as is now

A good Brexit will mean new trade deals with countries around the globe, other than EU, for example USA, India, Australia, Japan. \nAlso if we can have low tariffs for goods entering the EU and a reciprocal arrangement with goods coming here. We should continue to comply with regulations in industries that have global markets.

641

A brexit that keeps a single market open and still allows immigration in and out of the country.

642

643 Getting out of Europe,we don\t need them

All negotiations are amicable, no hostility between countries. Also no recessions for our country.

644

If we could leave the EU but still remain civil with other countries and have good relationships with them. Both trade and otherwise.

645

We leave Europe and their petty rules and regulations and make our country great again instead of the whipping boy it\s become we can decide on our own immigration level and buy from where we want not where we are told

646

647 There is no such thing as a good brexit.

648

Not sure

649

Stay in European market

650

none

651

If people\s lives weren\t influenced too much about it

652

protecting rights but leaving the eu

Hard to say since it\s a new process and they\ll be dealing with it as they go along, therefore having a realistic idea is near impossible.\n\nBut if I was to put it arbitrarily,

653

retain free movement & involvement in the single market. Increase in value of the pound.

654

STOP PAYING HUGE SUMS TO THE EU AND GOVERN OURSELVES AGAIN

that europe and uk do a deal thats sees a smooth transaction, without extra cost to the uk

655

and we can retain our own laws and sovereignty

656

no idea really

That we are still able to trade with other countries and that we still are able to visit

657

European

I would rather we hadn\t voted out in the first place but I think now it means have a clear and quick plan/response - start leaving as soon as possible to maintain stability. For me a good brexit would mean not being financially (or job wise) affected

659

A good brexit would mean that we leave swiftly and with a good, i.e. we stay in the single

660

market

Still being able to trade with other countries and pass freely into other countries. A crack down on immigration and not letting as many people from other countries take permanent residence in our country. The same prices for food and drink

661

We\d still be on good terms with the rest of the EU and are still able to trade with them

662

Staying in the scheme and trading zones

663

Freedom from EU political control. Especially concerning free movement of labour. I\m not much concerned about the free market or customs union. the UK is powerful enough and clever enough to succeed with or without them.

664

not losing our travel or working rights in the eu

665

non-discrimination, fair immigration, equal opportunities

666

667 To still have free circulation of European people and to have a good relationship with the
rest of the big EU players like Germany
668 Don't know
669 Still remaining part of free trade with Europe.
670 get the best deal
671 still unsure what is going on ,guess we will have to wait
672 theres no good about brexit. Terrible idea we have to live with
673 to leave the single market
675 Remain in EU
676 still being able to travel and work freely.
677 Leaving the EU and having no problems trading on the single market without being made
to carry on paying into the EU.

678 Remaining in single market. Backlash triggers second Scottish Independence referendum
679 immigration control and NHS improving

680 A clean exit then fresh negotiations with the world over trade etc. Addition of our
preferred parts of EU laws to British. New British directives.
681 Beneficial for the country
682 U.K. Will look after itself
Straightforward trade agreements without being tied to the European court of hr, red tape
683 and immigration
684 keep entry to single market at reasonable cost
685 Leaving eu and sending them all where they belong
686 I would rather we stay with a better deal
687 Still being able to access the single market even at a cost and being able to look after our
own immigration policy

688 Reducing the freedom of movement so we get more skilled immigration, but still allowing
efficient trading between the UK and EU. Also ensuring, people cannot claim benefits until
they've lived here a certain length of time
690 stay the same ish
Maintaining all the useful parts of being part of a European market without the constraints
of full membership. Dispensing with payments and rules that are detrimental to U.K.
691 growth.

692 I DON'T THINK THERE IS SUCH A THING AS A GOOD BREXIT, WE WILL LOSE THE SINGLE
MARKET AND PROBABLY INCREASE THE AMOUNT OF IMMIGRANTS WE GET NOW, IF NOT
693 FROM THE EU THEN THEY WILL COME FROM SYRIA, LIBYA ETC
694 Out of single market, controlled immigration
695 Everything to stay as it was as I wanted to remain in the European Union.
696 Better economy
697 No idea, and I don't think May has either
699 Safe a country
700 means where out of Europe
701 Not leaving the EU!
dk

703 Keeping trade with the EU and keeping human rights and equality legislation.

704 I think eventually the country will be better as a whole once we get over the numpties who
say its for worse. We can trade freely without the stupid people who know nothing about
our country telling us what to do. We can have control over immigration which is a big
issue for this country

705 Leaving the European Union but remaining part of Europe to allow movement and trade
706 A good trade and immigration still open deal
getting out of the EU quickly and taking back control of our country and who we trade with
707 and who we let in
708 Not leaving

A good Brexit (I can't believe I wrote those words) is to somehow make it seem that we've really left etc. but to actually not really have any changes. I would still want to be in the economic area, still want to be able to easily travel (not move) to EU countries, as an existing EU citizen, still want to be able to work in other EU countries at least for a few years without a visa, and I'd love it if the UK could actually still be involved in decisions. So basically, a good Brexit is a pretend Brexit.
709 Having more control over immigration and being able to offer more money for those work
710 do provide to society on low wage etc
711 free from euro control

712 to leave eu and bring the country under its own control rather than the eu control
713 An easy transition from the eu

Good relations kept with countries we trade with and fair trading deals. Nobody suffering due to brexit e.g. financially. The government to put money that would have gone to the EU into places and organisations that most need it rather than filling their own pockets e.g. the NHS, better mental health services, poorer areas or places classed as 'in poverty'.
714

total control of our borders, as tariff free as possible trade deal with europe. echr leave
715 and set up a uk bill of rights. our parliament decides the law and not european judges.
717 Britain getting back its manufacturing more jobs less immigration

We have got to a point where I see nothing good from any type of Brexit. I was not in favour originally and my position has not changed. Hard, soft, red, white or blue Brexit, we are still giving up access to the largest free trade blocs on the planet, on our doorstep on dreams (and lies) of fools and clowns. Any form of Brexit is now compromise, which means we have to give-up more than we could possibly gain.
718 There is no good Brexit and cannot be a good Brexit!!
719 not paying in to the EEC and making our pwn laws
720 A good balance of trade and imigration
721 Full UK control of law-making

Most important issues is that our environment is still protected and can we make it better
722 A good Brexit is not possible.
723 More employment
724

725 One where there's minimum disruption to the economy, i.e. A so called soft brexit

726 Free access to the single market
728 Free movement of British citizen in Europe
Get out as quickly as possible so we can get on with our own issues
729 Massive reduction in immigration, and long term strategies in keeping it at much lower
levels, even if means no single market or limited access.
730 Acting for ourselves not for others.

731 cut ties with the EU controlling anything with regards to the UK - we decide our own stuff

732 Britain taking control of its own affairs rather than being dictated to by Europe.
733 Staying in the EU
734 Nothing good will come out from brexit
735 To pay very little in return for access to the single market.

that the referendum Brexit vote was annulled as it was based on lies given by people who acted like those who start a fight in a pub and do a runner. A good Brexit to me would me a return of justice and common sense and the removal of deceit in the democratic process
736

737 Being able to trade with as many countries as possible, with minimal tariffs.

A complete exit from the EU and EU rules. No more taxes or subsidies. No more forced mass immigration. No more welfare for EU immigrants. Sending back benefit and health tourists. Trading with the world on our own terms.
738 Being totally free of the EU and able to make our own laws regarding immigration, human rights, trade etc
739

741 UK becoming more self reliant and independent. We have the resources to produce more
742 goods for home use rather than import. Let the fact we are an island work for us.
743 Less immigration, less tax, stable prices
744 The country getting more money!!

745 More control over our rules and regulations, and a cap on all immigration
746 Full access to the EU market, preservation of the banking passport, and the ability to
747 control our own currency and borders
748 Limited damage our working life.

749 A form of words that allow us to nominally leave the EU but in reality allows us to remain
750 inside the EU. We cannot afford to leave our biggest trading partner and the EU cannot
751 afford to lose its second biggest economy and the stability we bring.

752 Not sure

753 That we leave as soon as possible, to get our country back like it was before and our LAWS

754 TO

755 Closed borders\nOpen trade market

756 Keeping the closest ties to the EU possible; maintaining most of the regulations brought
757 about by the EU, plus laws from the EHCR. Continued free movement. Minimal impact on
758 businesses

759 Complete control over immigration, partial access to single market, more traditional British
760 values in the society, less political correctness, support for local produce, zero EU
761 intervention, British laws with regards to deportation, human rights, product quality etc
762 and new opportunities from non EU countries

763 access to the single market and a "fair" immigration policy

764 Exactly what the people voted for. Total exit

765 A negotiated settlement that was totally acceptable to both sides and maintained friendly
766 relation with the EU

767 Where we still have trade and free movement rights

768 we take back all our laws and economic control from the EU, we control our own borders

769 Products stay the same price

770 no such thing

771 Not sure

772 reduced costing

773 There is no such thing as a good brexit the IRA should blow her up
774 out of the single market completely. Repeal of some nonsensicle eu legislation. Not under

775 EU \'justice\' system at all

776 There is nothing good about brexit

777 Secure job at the end of the day.

778 Send all the immigrants back who haven\'t contribute to the economy and are using our
779 schools, health service & claiming benefits and don\'t let ANY more in.

780 For me, if Brexit must take place, then the conditions under which it does so should be as
781 close as possible to remaining a full member of the EU.

782 cut out asap and if they charge sanctions so will we and buy jaguars instead of bmw and

783 mercs

784 a reduction in immigration

785 Ability for us to set our own laws and control our boundaries/immigration as we wish -
786 make our own import/export arrangements. I would wish for people of other nationalities
787 who work here to have a right of residence for themselves and their children.

788 Stay in EU

789 Her it not happening at all. Us reforming the EU from within.

790 A seamless transition to a new trading partnership with the eu

791 To get out now,the country voted for it

792 control of borders while still having a functioning economy and financial security

793 Wouldn\'t affect my possibility of getting a job in the future

794 To get out Asap.\nNo free movement of people.

783 Proper planning, followed by '\getting on with the job\''. All the provarication and legal
challenges are dminging the Country.
784 A total break withbeurope
785 Enough money for me and my husband in our retirement years and me coming disabled
help in that department for all disabled people
786 Staying in the EU
787 close the borders
788 That it never happened.
789 None of it will be good

790 I don\'t know what a good Brexit would be - I wish we\'d remained in the EU. I suppose a
good Brexit would get the best deals in every area for the UK, keeping good trade relations.
791 Still having money, no job losses, better health care
To leave once & for all & listen to what people have voted for. Not try & change their
792 minds.
793 getting industry going and owed by British people
794 No freedom of movement no paying in to the eu

Keeping or improving on the good legislation from the EU , getting rid of poor legislation.
Having full control of our borders but still enabling movement in and out of Europe.
Improving trade relations around the World while maintaining good relations with Europe -
without having to pay too much or endure the more restrictive,unnecessary or ridiculous
rules that other EU states have insisted we follow - but do not themselves. Being respected
for our decision by other countries and not bullied by the EU into paying more to be
795 entitled to less
796 As little disruptio as possible - keeping free trade links

Getting out of single market and negotiating good trade deal with Europe and other
countries outside Europe. Getting out of ECJ and abolishing HRA. Controlling our own
799 borders and restoring parliamentary democracy.
800 stopping it all together

801 Same standard of life as till now, with economy not suffering from brexit, decreased
immigration from non-European countries, including granting asylum etc.
802 leaving the EU and dealing with countries on our terms
Access to the single market, allowing skilled europeans to work in London, funding for
803 farms and research by the UK government.
804 LOWER COSTS FOR THE UK AND LESS IMIGRATION
805 Everything is the same and no losses etc

Not a ideologic "hard" Brexit that benefits merely the powerful and a small, xenophonic
minority. But an evidence based position based on getting the best deal (which likely
includes keeping in EU economic areas, a la Switzerland and Norway). I also personally
believe that a good Brexit would possibly be one that never exists - as the referendum was
based on non-information, and so should be reheld when (if) the actual terms of leaving
the EU are negotiated. A vote to change (with no information on what the change will be)
806 is always going to beat a vote for the status quo.
808 Staying as close to before as possible

809 One that didn\'t screw up my job (or the jobs of any of my close family members). Also one
that doesn\'t lead to too much inequality - I\'m relatively affluent and the more inequality
rises, the more likely I am to be robbed.
810 controls over immigration and an equitable trade deal with the EU
812 Good negotiations with an outcome that will benefit U.K.
813 keeping free movement
814 not sure
815 Still having the benefits of being in the EU

816 We continue to trade with European countries without border restrictions or tariffs but
assume control over immigration and legislation issues.
818 To leave the European union so Britain can make its own laws
820 Not sure

821 to totally ignore Europe and the Europeans from tomorrow onward
824 dont know
825 No major problems.

We leave the European political union, so that we can decide on our own laws and
826 immigration policy. But keep free trade. So go back to what the EU was originally.
827 Stay in the trading zone without the political baggage
828 Still having access to the single market and ability to work abroad.

To leave EU as soon as possible and not to waste time negotiating ridiculous deals on the
single market as we buy more from Europe than we sell and France especially could not
829 afford for us to charge them a surplus on all the food and dairy products they supply.
830 Do our own things
831 Not sure
832 A hard Brexit. Leave as quickly as possible
835 Being independent not ruled by Brussels
836 A single market
837 Forgetting the whole silly idea and staying in the EU.

That the Government stop waffling around and trigger article 50 now. That the
Government rule the country and make their own laws. That the Government can say who
839 comes into the country and can expel undesirables.
Get shot of the draconian EU and all its misguided/authoritarian rules and malpractices.
840 Open our doors to the world for trade
I'm not really sure what it should mean. Surely we just leave Europe in the cleanest most
841 straightforward way possible
842 Quick, simple and cheap
843 Leave the EU asap
Maintaining business and trade relationship with EU, and not restricting free movement for
844 EU citizens (at least not immediately)
leaving the EU of all its ties/ controls with them, being independent from them, how we
845 used to be
846 A good Brexit would need a second referendum and remain result!
847 It not happening at all. If it isn't broke, don't fix it.
848 not bothered doesn't effect me
One that brings a few required changes that improve the standing of the UK for the
850 indigenous people as well as how the World sees UK.
851 Nothing, I voted remain
852 I don't really know

Control of our borders, immigration etc. It would also mean that we could trade
appropriately, which I think will happen, since we are too important a market to be shut
out by EU companies. I also believe that it's naive of all & sundry to be expecting the
Government to be exposing its negotiating position. It should carry on as it is now
proceeding, and that's part a good Brexit - Keep the others guessing, just as should apply
853 in any negotiation.
854 I don't now

Maintaining the right to move and work in the EU.\nMaintaining the strong environmental
protections and other protective legislation.\nStaying part of the single market.\nPretty
855 much - as little Brexit as possible!
An agreement in place where we could still trade with Europe but also use America etc to
856 boost what we are losing
857 Control of immigration with good trade agreements
858 DK
859 We don't end up in a big mess
860 Absolutely no idea. An irritating statement
I'm not sure there is such a thing as a good Brexit!!! I didn't vote for it, and I still don't
861 feel we should've voted to leave.
862 things would be easy to negotiate
863 Still keeping close ties with Europe
864 The whole stupid idea being binned

A cancelled Brexit, since the majority of the population now seems to realise what a terrible idea it was. If we are forced to Brexit because Teresa May has no spine then it should be the softest Brexit possible since that is what the extremely slim majority in the referendum suggests most people would want.

865

866 seamless

867 NO MORE BLOODY IMMIGRANTS , NO MORE MONEY TO BRUSSELS

868 No disruption to the country and no reduction in my personal finance

869 keeping the bits that are useful to our economy

870 It not to happen

871 Leave quickly with our terms so we can get on with sorting United Kingdom out

872 Don't know

874 No Brexit at all.\nKeeping all the same terms that we had before without too high a cost.

875 Scotland becoming independent and back in the EU due to brexit

877 No impact on house prices or employment

a soft brexit is a good brexit - keep financial passporting and trade links. I don't really care that much about immigration, I would like refugees monitored and more screening to make sure they are who they say they are. increased focus on integration and aligning values with the british way of life. no more red tape from the EU enforced on the UK that wasn't voted for by the british public (bring back bendy bananas ha).

878

I'm really not sure. I think we need to go through with it as the majority has voted for it. I am sure they will look to get us the best deal.

879

ability to control our own destiny, whilst maintaining relations with the rest of Europe, and having our the ability to make and maintain our own laws and customs

880

Total disengagement from the EU.\nContinued friendly relations with European

881 nations\nControl of borders\nControl of terms of trade

883 Don't know

A curb on immigration , through this countries borders and control of the countries laws, trade etc

884

To keep the things that benefit people... freedom of movement, prices at a decent amount. Or to not Brexit and to remain

886

Brexit should happen asap. It has already had a massive positive impact on jobs and the economy. The only downside has been the deliberate attempts of the EU and major banks to hurt the UK pound as punishment for daring to try and claw back some of our democracy. I still have grave doubts that we will be allowed to leave, and even if we are able to leave they will try extremely hard to make it bad for us so that 4 or 5 years down the line they hope we will beg to re-enter. They will fail. The days of the anti-democratic marxist / fascist EU and its evil plans for a corporate new world order (one government) are doomed. It was the best thing to happen in years when we voted for brexit, and won despite all the government lies and cheating (e.g. government funding of extra remain leaflets, and unbelievable remain bias in the media).

887

That I wouldn't notice that much difference in my life, that life would carry on as before.

That we would be able to trade with any part of the world and so have improved

888

productivity. That Brexit would be achieved swiftly not hanging on forever

889

Sorting own affairs out.

That the UK still has a good reputation with other countries inside and outside of the EU.

890

That there aren't any ridiculous restrictions put on importing and exporting

Not too much change to our lives as we know them know. We have become used to

European funding and laws so I think the Government should replace the EU funding if it stops and do a gradual transition to any big changes.

891

Quick and with minimal disruption to the functioning and economy of the uk

892

893 A good Brexit would mean keeping the trade agreement with the EU and allowing a degree of free movement. Also, not to alienate ourselves from EU

894 The UK regains full sovereignty over its laws and trade; the jurisdiction of European courts is ended, the UK is free to negotiate its own trade agreements, and the free movement of people aspect of the "four freedoms" is ended. A reasonable settlement regarding existing EU residents in the UK and UK residents in the EU on a reciprocal basis is completed and, likewise, reciprocal arrangements regarding access to capital and services agreed. The UK should not seek to impose new tariffs on EU products, provided again that reciprocity is agreed. The UK should remain in all pan European organisations considering security, aviation, shipping, telecommunications, climate change/environment and similar strategic issues. Non immigrant entry to the UK from the EU should, if possible, remain visa free on a basis similar to that which exists with the USA.

895 No price rising

896 It means that Britain exit the EU

take up trade deals with non-EU countries such as the USA, Australia and so on.. If Europe want a trade deal - fine. But don't start paying back into the E.U. or adopting their policies again.

897 Be responsible for our destiny/laws etc

898 Getting on with it and not stalling like she is doing.

899 too early to say yet

900 Good Brexit? It's an oxymoron!!

901 That we keep our trade deals while keeping our laws.

A good Brexit means a clean break from the beauraucratic, outdated, failing EU and the ability to forge our own path and take advantage of the opportunities that not being tied into EU regulations gives us.

902 Less division

903 deport all the immigrants, make them pay for stolen NHS, close borders, points system only, no benefits allowed to be sent to EU, free trade deals with all those queuing up like Canada, Australia, New Zealand,

904 Deporting all eastern Europeans with immediate effect. telling Merkel where she can stick her EU treaty. 500% import tax on Chinese made goods. Nationalisation of the railways and all non UK firms that control UK infrastructure like gas, electricity, water etc forced by government to sell to English companies. Immediate halt on immigration. Introduction of death penalty for terrorists. Closure of UK mosques.

905 That she can get the best results for most of the people to be satisfied. \nIt will be impossible to get everything, as leaving EU GB cant have specials

906 A good Brexit would mean no noticeable changes.

907 economic growth

908 That we come out of the euro zone and be competitive around the world through business and finances so England can stand on its own and be the beacon it used to be around the world

909 No Brexit at all

910 more jobs available for uk residents and better funding for the nhs

911 Security, more jobs and more houses

912 stop the migrants as the country can't cope. stop all foreign aid apart from natural disasters, get control over human rights laws that are being exploited but have some sort of trade deal

913 Continuing to trade with the continent, but not having to conform to EU dictates.

914 Taking back control of our own country/laws and stop giving billions of pounds away to so called foreign aid

915 That we get good trade deals.

916 To get the ball rolling. The chance to still have some link to the free market whilst creating new ones with countries we couldn't previously whilst in the EU

917 Of we canclad. It

918 Unsure

I don't believe there is such a thing as a good Brexit, I voted to remain and I still feel we are making a mistake. However, trade agreements are the most important things to get sorted as the economy needs these to continue growing. We are already seeing a number of business saying that the consumer will have to pay more as their costs are going up, we need to stop this if we can. If getting good trade agreements means we have to offer EU citizens freedom of movement then that is what we will have to do.

931

To leave the Single market and take back control of our borders

933

I don't think there is any such thing as a good Brexit. However, keeping close ties with Europe would be the best of a bad situation.

934

To be able to trade with European countries and the economy to improve

935

938

no free movement, new trade links with other countries, uk law above european law

939

There is no such thing as good brexit. I think the brexit will make things worse for uk not sure.

941

Removing all trace of EU legislation from the laws of England & Wales, repealing any legislation that has been incorporated in our law and no further payments to, or contact with the European Parliament or Commission.

942

REMAINING AFTER ALL

943

Means owning our own country and laws.

944

It means ensuring interests of Britain and its people are kept intact while separating from EU. Also get best trade deal with EU to ensure growth for British economy. Immigration control should be under Britain without any interference from EU.

945

Brexit

948

i think the Brexit is a bad thing

949

Brexit means the UK leaving the EU, not the EEC

950

Getting out of Europe quickly and efficiently

951

More jobs, improved nhs & education & immigration controlled

952

A good brexit would be no brexit at all. The whole thing is insane and should never have happened. We're already paying a price with the collapse of sterling, and that's only going to get worse.

954

Don't know.

955

Not leaving the EU at all. Staying in the single market and keeping free movement of people

956

Good Brexit would mean the UK still having access to the single market, as well as developing ties with other global economies. It would also include fair access to the UK for those in need of help from war torn countries.

957

in particular: Reclaiming our sovereignty, strengthening border controls, alleviating public service problems which are due to increased population and migration, and the opportunity to trade worldwide.

958

Not having a Brexit in the first place

959

A prompt and efficient removal of the UK from the EU. Of particular importance to me is to remove our country from the costly, stifling, wasteful bureaucracy of the EU. However we need the freedom to trade worldwide with minimal barriers or tariffs. Our country needs to be protected from the current chaotic movement of people across EU borders.

962

There is no such things as a "good" Brexit we should be staying in the Eu not leaving it. The Referendum was poorly worded and some people appear to have voted as a protest rather than "for real". There has been peace in Europe for over 50 years ... if we leave there is less chance of this peace continuing.

963

Total control on immigration, anyone in this country who came here illegally should be removed without appeal because they broke the law to come here. Any immigrant who has not worked and paid into the system for at least 10 years should not be entitled to any benefits. No one should be allowed in to live here unless they have a job to go to and they should all have medical cover. If they haven't paid into the system they cannot take anything out of it. Those EU and non EU who have come here as economic migrants should be deported. If they commit a crime they should be deported immediately back to their own country to serve their sentence and we can pay their country a set fee to cover their stay in prison. Tighter borders and not pay anymore money into the EU, to hell with them. We need to get out of the sinking EU as it is going down and it will all end in tears due to the invasion of a certain religion, we need to pull up the drawbridge now, we are an island with limited space.

964

965 No such thing as a good BREXIT, as far as I am concerned.

966 Maintain both free trade within the EU & 'open borders' for EU citizens!

A good Brexit is one which works to promote UK independence both politically and economically.

967

969 Leaving and sending all the foreigners back to there homes bringing more homes and jobs for british people

970 ensuring we still have access to the single market

971 To not happen, or if it does, minimal practical changes

972 freedom from the EU and all it's baggage.

973 TO LEAVE EUROPE AND MAKE OUR OWN NEGOTIATIONS IN THE SINGLE MARKET

that we still have a standing in the world and we do not have to pay out so much money to be in the eu and use it for nhs instead, and immigrants have to be genuine asylum seekers and not just coming here for benefits
that we still have a single market

974

975

I don't think it will make any difference for me because I am 67 but the younger ones will suffer if we leave the single market so there isn't really a "good" Brexit

977

978 I don't really know enough about it to say.

979 Staying in the EU

980 Better border controls and our setting our own laws

981 getting the best deal possible for us

982 Still trading with Europe on mutually beneficial terms. Negotiating separate trade agreements with other important world economies.

983 A good brexit would happen smoothly, we would get good trade deals with other countries and that we would remain part of the single market

985 getting out of the eu but may is useless so i doubt it will happen

986 less immigrants

That there is a "good" trade deal with Europe as without a strong economy the UK may struggle for the next decade. We need to develop more trade links globally too.

987

989 not much, do not think it will affect me much

991 Not having it

992 Quick Brexit.

993 making sure we can still trade within the EU and get better deals from other countries too

A non-existent one. Certainly not leaving the free market and not expelling EU citizens. I wouldn't want any changes to current ties with the EU.

994

995 Getting the best possible deal for the UK, even if it is at the expense of other eu countries.

996 Would be No Brexit at all as the motives behind Brexit are hatred and xenophobic

997 Restrictions on immigration. Laws made by UK not Europe

Reducing immigration and stopping bowing down to EU rules. We need to make our own laws and rule our own country nobody else should be able to 'govern' us as they do now.

999

1000 Some actual decision making, a set direction, no more dithering on the politics
1001 No immigration, we can set our own rules
1003 No more useless immigrants, especially moslems, and complete independence from Europe to make our own laws.
1004 Remaining in the single market but removing political ties so that we control our own politics and laws.
1005 a better deal for the UK
1007 Keeping ties with Europe, still being able to visit mainland europe freely and trade freely but with more control over our own law
1008 keep echr, keep trade agreements
1009 London stay the rest can go!
1012 Britain beibg independent
1013 For the country to be COMPLETELY independent and separate from Europe in EVERY aspect.
1014 start a fresh and make deals within europe afterwards
1016 Ability to maintain my standard of living, feeling safe when I go out, and enjoy the freedom to travel abroad.
1017 Keeping all the benefits of being in the eu without harming the country
1018 Independence. Security. Control of borders.
1019 WE LEAVE THE EU WITHOUT A LOT OF PROBLEMS FOR ME AND MY FAMILY
1020 To trigger the Brexit in accordance with the rules. The people voted to come out of Europe in June so get on with it
1021 No more immigrants

1022 one that we set the terms of leaving not giving the EU the right to set the terms
1023 A rise in interest rates for my savings!!!!
1024 I don\'t think we will get a good deal coming out of Europe, I voted to stay in and feel that is still our best option.
1025 Controlling immigration
1026 To leave the European Union completely so that we no longer have to abide by their laws and conditions.

1028 Taking more control of immigrants and us making our own choices as a country
1029 I\'m not interested in politics
1030 To be Great Britain again, more control on managing Britain
1032 Not sure
1033 Exit the EU, negotiate trade deals with other countries incl the EU, take back control of our borders, deport criminals back to their EU countries,\nask for all residents to speak and understand English.

1034 As little change as possible - I was happy with the way things were before the referendum

1036 Keeping freedom of movement, free medical care in the EU, collaborating with Europe scientifically and creatively, giving people already here freedom to remain, keeping the rights and freedoms we have under EU law
1038 A good brexit is being in complete control of immigration and also having many countries wanting to do deals with us.
1039 It stops> Or at least a soft brexit, retaining full membership of the single market. Anything that make Nigel Farage unhappy.
1040 Exit from Europe that maintains a stable economy and retains our control over immigration
1041 A full and frank withdrawl from the EU
1042 negotiated incentives like on imported goods etc and control of our own borders with a ban on immigrants
1046 A TOTAL BREAK FROM EU
1047 THAT IT IS ABANDONED
1048 Leaving with some trade deals. Still having good access to europe for easy travelling. Being able to have a tighter control on laws and immigration. Keeping good relationships with europe

1049 Continued free travel to Europe with hopefully suitable trade agreements

1050 Well executed exit with the UK economy at the forefront of decision making
1052 A total mess, especially for the workforce
1053 Nothing - didn't want Brexit to happen
1055 simple straightforward and as soon as possible.
Coming out of Europe in a way that keeps out position strong and doesn't damage the
1056 economy too much
1057 more hassle going on holiday
1058 clean without bother from other countries and 3rd parties

Essentially removing the UK from all EU controls. Returning the UK to the position we were
in before we joined the EEC. That would be the best possible Brexit. A good Brexit - and
this assumes there has to be fair negotiations based upon equal positions for both sides -
would be one where we achieve the best possible negotiated agreement to withdraw from
all EU controls.
1060
1061 leave europe and not give them a penny
1062 getting out of the eu and controlling immigration

There is no such a thing as a good Brexit. The problems are piling up already and I cannot
1063 see that any good will come of it. A good Brexit would be no Brexit!
It means that we get to be our own country again, and do what we need to make future
1064 look better.
Standing on our own two feet , in charge of who comes to this country and that they are
1065 legit. Tougher on our own human rights and laws.
1066 No idea
1068 NO BREXIT. I think brexit would be terrible for our economy
1069 Friendly withdrawal from eu, stay on good terms with eu countries
1070 Quick exit, no second Scotland referendum,

Retaining links and relationships with European Union countries, but not as part of the
European Union. Taking back control from Europe. An end to the free movement of people
across Europe, an end to the European trade cartel, no longer part of European Human
1071 Rights legislation, and the end of wasting Billions of tax payers money each year.

1072 Not doing anything, I voted to remain so pleased that nothings really been done about it
1073 To prioritise British people of all class
1076 to stick with what the people have voted for and the reasons
1078 that we are able to trade with the rest of the world
1081 It wouldn't
A good Brexit would mean we stay on good terms with our European neighbours not only
1082 financially but also supporting each other.
1084 No Brexit at all! Won't happen. Still having free trade with europe
To stop paying money to the EU and to stop taking immigrants from the EU. Just being
grown enough to do our own trade deals with whoever we want to. And being in control of
1085 our own Laws.
1087 Swift execution
on a personal basis although I have been domiciled for here for 45 years she needs to
ensure that EU nationals can continue to reside in the UK.. she achieves a win/win exit
1088 from the EU if that is possible

1091 to leave the EU completely and try and control (however problematic) our own destiny
1092 that we leave the EU and get on with being the UK
1093 Britain making her own laws and less immigation
1095 I don't think there is such a thing.
That whatever is decided is done for the best intentions and that the majority of people
1096 can be happy with the decisions
to get out asap without any faffing around,government should respect the peoples vote
1097 and not use delay tactics
1099 not sure
1100 Don't really know
1101 Good trade deals. Sovereignty returned to UK. Control of borders.

1102 A Brexit where we remain in the Single Market and keep close links with the EU.
freedom from EU legislature with the opportunity to trade with all countries in the world
1104 not just the EU
1106 economy improve
1107 Who nows with Thersa May and Donald Trump?
to be independant, cut loose from every country that wants to control us. \nLet\'s go
1110 down the apprenticeship route again, build up the skills in our country and support
ourselves

separation from european parliament, no or minimal contributions to the budget, free
1111 trade with Europe and ability to govern ourselves and control our borders
1112 If we must have Brexit we should have it hard.
1113 No tariffs
1116 Far less immigration. 1.5 euro to the pound.
1117 no more paying out to Europe and control of our own borders
1121 to get out of the EU NOW!
To leave the EU just as soon as possible so that me can regain our sovereignty and respect
1123 this country deserves
Remaining in the single market, but having more controls on migration within the EU e.g.
1126 on immigrants\' access to social benefits

1127 a start to getting the uk back to being british and looking after our own country

1128 Some clarity as to what is going to happen as it would appear that nothing is clear
1129 That the economy continues to thrive and inflation is kept in control
Out of Europe, a stop to immigration till there is sufficient housing, school places and nhs is
1130 fit for purpose, out of the single market
1131 Not leaving the EU
getting out of the EU ASAP to run our own affairs, without having to go through all the
1132 hoops that Europe will try to put in the way.
1133 not leaving in the first place
1134 instant divorce from the EU and the European court

1136 complete break with the EU and its legislation, rules, open borders, courts, trade
1138 no such thing
1141 To be out of Europe

I would like us to be able to trade freely anywhere in the world, especially with our
commonwealth family for good deals and friendly trade. I would like us to be able to stop
EU deals that have been forged in the past that involves us buying stuff that we no longer
favour or want. For instance --- if the market says that the public are looking to buy wines
from far afield like South America, Australia, NZ, Eastern Europe, why should we be forced
to honour a deal that means us buying French or German wines that we no longer want.
Stuff the single market lets go it alone and scare the other EU members by going it alone.
They want to buy our stuff don\'t they and they want us to buy theirs so what if we say we
1142 don\'t want it??? Call their bluff.
Control of our own borders,Laws and immigration. Also to make our own trading
1143 arrangements.

1144 staying in the single market and continuing freedom of movement throughout Europe

Return of control to the UK from Brussels in matters of control over primary legislation, the
pre-eminence of the UK Parliament over Brussels in all matters, control of the UK\'s
borders and ability to decide who is allowed in and udner what conditions, the withdrawal
from the single market and the EU Customs Union and the withdrawal from the EU Human
1145 Rights set-up

A good Brexit would be a clear break from the EU, with trade deals of advantage to all
parties. No soft wishy-washy Brexit, we need to make our own way in the world. The UK
1146 has always been a pioneering country, and the EU is bad for us.
1148 to stop Brexit, or an independant Scotland

1149 as soon as possible with the best negotiatons for england
friendly and good deal, something that can make everybody happy and not only those who
1150 vote for Brexit,

1155 Complete severing of links with the EU and successful negotiations on trade and tariffs.

Leaving the European Parliament, Saving Money sent to EU, No requirement to obey their
1157 laws, Immigration controlled. Access to single market on favourable terms.

1159 A good Britex for me means to be free from the EU and being masters of our own destiny
1163 Nothing. It was a mistake to leave Europe
Out and stay out, boarder control, stop all migrants, stop all foreign aid, no EU interference
1164 in UK matters.

Ability to run our own country i.e. negotiating trade deals with the rest of the world,
having a reciprocally free or nearer free trade deal with the EU, our right to control our
own boarders and allowing in only people from the rest of the world who are not a drain
1165 on our resources i.e. unemployment benefits, access to our NHS with out charge.
1166 Better economy
1167 Retaining membership of the single market

Control of borders,our own laws and to determine our own future.There will be costs
regarding trade with Europe but,as we import more than export we can make our tariffs
1168 count.Also we need to ensure our businesses make tradw deals with the whole world.

1169 leaving the EU and standing on our own feet as a nation making our own decisions
1176 getting out of Europe sooner rather than later
1177 not sure if it is good or bad

Actually it would mean staying in the EU. But if we have to leave, it should be on good
terms (economic and political) with all our European neighbours, thoughtfully negotiated,
1180 with no attention paid to the hysterical anti-EU press in the U.K.
1181 no massive changes or losses to everyday life
1185 Dealing with Brexit quickly and keeping the public informed.

That we leave the excessive rules and regulations of the EU. That we negotiate a good deal
for the UK. We should be able to negotiate trade deals on our terms for the benefit of the
whole of the UK. We can still be part of Europe but we need to take back as much control
1190 as possible and make sure that, as far as possible, we put ourselves first.
1191 Just get the country OUT of the EU
1194 Still staying within the euro and getting all the benefits of the free trade

1197 it should mean what the british puplic voted for and we should have left immediatly
1198 curb immigration and give us control of our borders
A swift exit from the EU with as few repercussions as possible. Money spent at home on
1199 the UK rather than elsewhere
1200 we leave europe altogether and get back to our own values
1205 soft

Economy maintained, adequate resourcing for NHS, control of laws and migration for the
good of those and equity for who already live in UK as citizens.
1210 staying put
1218 Reasonably fast, less immigration
1231 A quick one
1235 A quick withdrawal with a clear strategy outlined for the future
1236

We would maintain some trade agreements with the EU but would also be able to make
our own agreements with other countries. We would be able to control immigration in
terms of who can come and work in UK, not necessarily stopping immigration. We would
be able to make our own decisions on how our taxes are spent, how our judicial system
1243 works.
1248 more expensive things

The UK retains good trade concessions with Europe and we still have the benefits of a
1249 European passport.
1252 not really thought about it
1255 to leave the EU now and negotiate once we are out
1257 More independence from EU decisions
1259 Too early to tell
