Table 4

Q.4 I'd like to ask how optimistic or pessimistic you are about Britain's economy. Thinking about all the things that may affect the economy - such as changes in salaries and wages, the level of interest rates and tax, the rates of inflation and unemployment, and the strength of the pound - how do you think the British economy will fare over the next year?
for the country as a whole

Table 11

Q.10 Government borrowing has risen significantly in recent months to fund the measures taken to prevent the collapse of banks and to address the effects of recession. All the main political parties agree that whoever wins the next election, steps will have to be taken to reduce the level of government debt. At a time of low or no economic growth, there are two main ways in which governments can reduce debt - by increasing taxes and by reducing the amount spent on public services and the running of government

Q.13 Currently it is illegal in the UK to assist a person in committing suicide. There have been a number of reported cases of people travelling to a Swiss clinic where they can legally be given drugs that will cause their painless death. Most, but not all, of those taking this course of action have been suffering from terminal illness. Do you think that, in cases where an individual is of sound mind and has made unambiguously clear that they want to die and want or need help to do so, the law in the UK should or should not be changed?
to legalise doctor-assisted suicide, similar to what is practised in Switzerland, so that a doctor could assist someone to commit suicide without facing prosecution
