Q3. To what extent do you agree or disagree with the following statements about your hand washing/sanitizing practices and behaviours throughout the COVID-19 pandemic? Summary Base: All respondents

		I now wash/ sanitize my hands more than I did before the COVID-19 pandemic.	As a result of government messaging during the pandemic I believe I now have a clearer understanding of when I need to wash/ sanitize my hands.	As a result of government messaging during the pandemic I believe I now have a clearer understanding of why I need to wash/ sanitize my hands.	I believe that washing/ sanitizing my hands frequently is the most important thing I can continue to do to protect me against COVID- 19 infection.	I don't wash/ sanitize my hands frequently anymore because I have heard that the importance of hand hygiene to prevent the spread of COVID-19 has been exaggerated.	I am not going to wash/ sanitize my hands frequently anymore because COVID-19 is no longer a risk.

Q10. To what extent do you agree or disagree with the following statements about hygiene and hygiene practices during the COVID-19 pandemic? Summary Base: All respondents

		I believe that wearing a mask in crowded indoor places is the most important thing that I can continue to do to protect myself against COVID-19	I believe that wearing a mask indoor places is the most important thing that I can continue to do to protect others from COVID-19	I have been fully vaccinated so I don't believe I need to take extra hygiene precautions anymore to protect myself from COVID-19	The COVID-19 pandemic has made me more confused than I was before about when, why, and how to practise good hygiene to prevent the spread of infectious diseases including COVID-19	I am worried that not being exposed to other germs because of the measures to prevent spread of COVID-19 is weakening my jimmune system	I hear, see, and read too much about good hygiene and good hygiene practices	I believe that getting people to change their behaviour to prevent the spread of infectious diseases is as getting people to change their behaviours to prevent climate change	I am fed up with being asked to practise hygiene all the time, I think it's a waste of time
