**Q2. As things stand today, all working parents in England are entitled to 30 hours of government-funded childcare per week for each child aged 3-4. Thinking about how the Government could support parents in employment through childcare, which of the following measures, if any, do you think are the most important for the Government to introduce? [Rank top three]**  
**- Extending free childcare provision from the current 38 weeks to 52 weeks (i.e. including school holidays)**

This compares to the current arrangement where childcare is only subsidised for some families of children aged 2-4. Table 20

**Q4. There are laws in place that limit the number of children each childcare worker can be responsible for at any one time. Currently, there must be one adult for every eight children aged 3 and over (or one adult for every three children under 2). Ratios such as these are in place to ensure the safety of the children and quality of care. Increasing the number of children each childcare worker can be responsible for could, however, make childcare cheaper. Which of the following statements regarding laws on the number of children each childcare worker can be responsible for do you most agree with, even if you don't completely agree with any of them?**
